

# Graduation Project Presentation

---

**Track: Oracle Digital Accounting Specialist**

**Cash Management Operations and  
Reporting in Oracle ERP**

## **Track: Management and ERP**

**Prepared By : NEXT20 \_ONL1\_ERP1\_M2d**

- **Ahmed Omar Mohamed Hashem**
- **Ibrahim Mohamed Saber**
- **Esraa Nabil Mohamed**
- **Mohamed Abd El Hafeez Ahmed**
- **Manar Mohamed Ibrahim**
- **Nada Abdulrahman Fikri**

**Supervisor: ENG. Ahmed Maged**

# Goals of the project

The main goals of this project are to provide hands-on experience in managing cash transactions and reporting in Oracle ERP's Cash Management module.

- ✓ **Create and Manage Bank Accounts:** Learn how to set up and manage bank accounts in Oracle ERP, ensuring accurate entry of account details.
- ✓ **Record and Manage Cash Transactions:** Develop the ability to record manual cash transactions, such as deposits and transfers, and track their impact on cash balances.
- ✓ **Cash Forecasting:** Build a basic cash forecasting model to estimate future cash balances based on historical data and adjust forecasts as needed.

# Project Description

This project is designed to provide practical experience in managing cash operations and reporting in the Oracle ERP Cash Management module.

Through tasks like bank account setup, cash transactions, bank transfers, forecasting, reconciliation, and cash positioning, the user will learn the entire process of managing an organization's cash flow effectively.

## 1. Bank Account Create and Management

1. Learn how to create and manage bank accounts in Oracle ERP
2. Enter key bank details, including account number, currency, and bank branch information

### Creating a New Bank Account:

Navigate to "Bank Accounts" and select "Create" to set up a new bank account.

The screenshot shows a web browser window with the Oracle E-Business Suite R12 interface. The browser tabs include 'Home', 'http://apps.ex...HwVxHEZgkJw...', 'Oracle E-Business Suite R12', and 'Create Bank Account'. The address bar shows 'apps.example.com:8000/OA\_HTML/OA.jsp?OAFunc=CE\_ACCOUNT\_CREATE&OAHP=CE\_ACCOUNT\_SEARCH\_HOME&addBreadcrumb=Y&\_ti=1312428817&soapc=8&oas=ZF37pQC'. The page title is 'ORACLE Cash Management'. The user is logged in as 'OPERATIONS'. The main content area is titled 'Manage Bank Accounts' and 'Create Bank Account'. It includes a breadcrumb trail 'Manage Bank Accounts > Bank Accounts >'. Below the title, there is a legend: '\* Indicates required field'. The form fields are: '\* Country' with the value 'Egypt', '\* Bank Name' with the value 'CIB\_banque', and '\* Branch Name' with the value 'CIB\_asyut'. Each field has a search icon. At the bottom right, there are 'Cancel' and 'Continue' buttons.

## **2. Bank Transfers**

- 1. Process inter-company or inter-bank account transfers.**
- 2. Track and post cash movement across multiple accounts.**

- 1. Access the Cash Management Module: Log in to Oracle ERP and navigate to the Cash Management module.**
- 2. Select the Bank Transfer Transaction Type: Look for a transaction type specifically designed for bank transfers. It might be labeled as "Bank Transfer," "Inter-Bank Transfer," or something similar.**
- 3. Enter Source and Destination Accounts:**
  - Specify the bank account from which the funds will be transferred (source account).**
  - Select the bank account to which the funds will be sent**
  - (destination account).**

#### **4. Input Transfer Amount:**

**Enter the amount to be transferred.**

#### **5. Provide Payment Details (if necessary):**

**Depending on your organization's setup, you might need to provide additional details such as:**

**Payment method (e.g., ACH, wire transfer)**

**Payment reference or description**

**Beneficiary information (for international transfers)**

**.screen shots**

**The data of the source bank and the destination bank .**

**The transfer data and amount.**

### 3. Bank Reconciliation

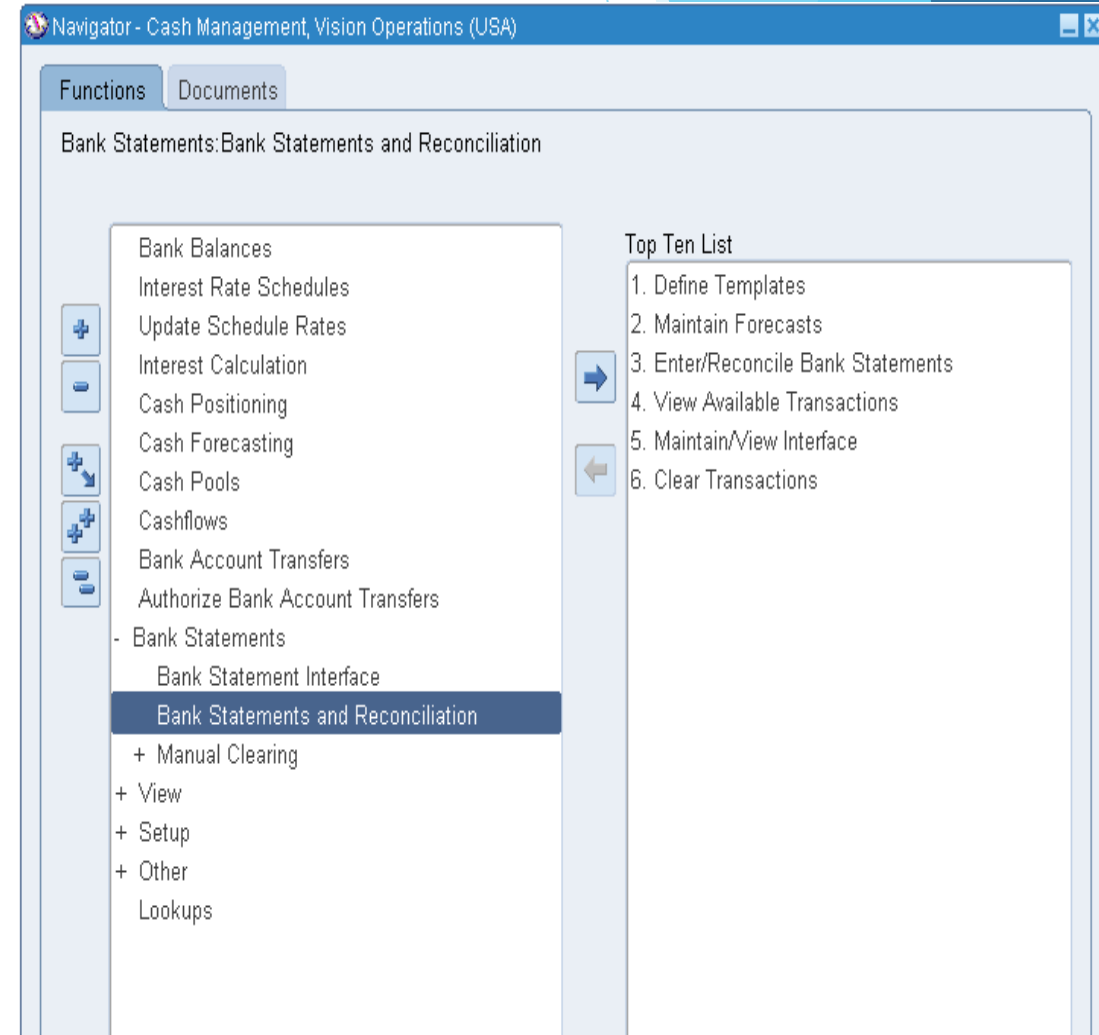

- Perform a bank reconciliation to match system records with the bank statement.
- Identify discrepancies and adjust system records where necessary.

## Bank Reconciliation;

- Creating Bank Reconciliation Statements
  1. Payment Reconciliation

### Steps:

- Bank Statements-> Bank Statements and Reconciliation

## ► **To create a new bank statement line from reconciled transactions:**

1. **Navigate to the Find Bank Statements window.**
2. **Enter the query criteria for the statement you want to reconcile, or leave the criteria blank to query all existing statements.**
3. **Choose Find to see the Reconcile Bank Statements window containing the statements that meet your query criteria.**
4. **Select the statement you want to reconcile, and choose Review. Optionally, choose New to enter a new bank statement.**
5. **If you are entering a new bank statement, enter the bank statement header information. If you select an existing bank statement, Cash Management displays the corresponding bank information.**
6. **Choose Available to search for detail or batch transactions that are available for reconciliation.**
7. **Enter your search criteria in the Find Transactions window, or leave the criteria blank to search for all available transactions.**
8. **Choose Find.**
9. **Select the detail or batch transactions that apply to the bank statement line you want to create.**
10. **Choose reconcile. Cash Management creates a new bank statement line with an Amount and Type that match the reconciled transaction(s) for that line.**

❖ Close the form  
Menu-> View-> Requests

❖ Click on Find  
Click on Refresh Data

The screenshot shows the Oracle Applications 'Requests' window. The window has a menu bar (File, Edit, View, Folder, Tools, Window, Help) and a toolbar with various icons. Below the toolbar, there are buttons for 'Refresh Data', 'Find Requests', 'Submit a New Request', 'Submit New Request Set', 'Copy Single Request', and 'Copy Request Set'. There is also a checkbox for 'Auto Refresh (X)'. The main area contains a table with the following columns: Request ID, Name, Parent, Phase, Status, and Parameters. The table lists several requests, with the first one selected. To the right of the table, there is a 'Top Ten List' with the following items:

1. Define Templates
2. Maintain Forecasts
3. Enter/Reconcile Bank Statements
4. View Available Transactions
5. Maintain/View Interface
6. Clear Transactions

At the bottom of the window, there are buttons for 'Hold Request', 'View Details', 'Rerun Request', 'View Output', 'Cancel Request', 'Diagnostics', 'Reprint/Republish (J)', and 'View Log (K)'. A 'Open' button is also visible at the bottom right of the window.

## 5. Reconcile with General Ledger

- Reconcile the Cash Management sub-ledger with the General Ledger.
- Ensure all cash transactions have been correctly recorded and posted.

### 1. Reconciliation with General Ledger Using Oracle ERP

**Objective:** Ensure that all cash transactions recorded in the Cash Management module are accurately reflected in the General Ledger, maintaining data consistency and preventing errors in financial reporting.

## ► Steps

in Oracle ERP:

1. **Extract Cash Transactions:** Navigate to Cash Management → Reports → Cash Transactions Summary. Filter by the relevant period and type of transactions (e.g., deposits, payments).
2. **Generate General Ledger Reports:** Go to General Ledger → Reports → Account Analysis and extract a detailed report of cash-related accounts for the same period.
3. **Identify and Analyze Discrepancies:** Compare the Cash Management transactions with the General Ledger entries. Look for missing records, incorrect values, or duplicate entries.
4. **Post Adjustments if Needed:** If discrepancies are found, create adjustment entries through General Ledger → Journals → Create Journal Entry, ensuring each entry is documented properly.
5. **Verify and Confirm:** Run a Trial Balance Report to ensure both systems are now fully aligned. Outcome: All discrepancies have been resolved, and the Cash Management and General Ledger are fully synchronized.

## 6. Review and Adjust Cash Forecasting Model

- Finalize adjustments to the cash forecasting model based on end-of-period results.
- Create a detailed forecast for the upcoming period.

## 2. Cash Forecasting Review and Adjustment Using Oracle ERP

**Objective:** Analyze previous cash forecasts, adjust the model where necessary, and create a new forecast aligned with actual financial conditions.

## ► Steps

in Oracle ERP:

1. **Retrieve Actual Cash Flows:** Go to Cash Management → Reports → Cash Flow Statement and extract actual inflows and outflows for the current period.
2. **Compare Forecast vs. Actuals:** Use Cash Management → Forecasts → Compare Forecast vs. Actuals to analyze any deviations between previous forecasts and actual performance.
3. **Update the Forecast Model:** Adjust the forecast model by accounting for changes, such as delayed payments or unexpected expenses. Go to Forecasts → Create/Update Forecast to input new assumptions and data.
4. **Generate a New Forecast for the Next Period:** Create a forecast based on:  
Expected Revenues: From outstanding invoices. Anticipated Expenses: Including payroll, vendor payments, and operational costs. Cash Reserves and Planned Investments. Export the forecast as a report for management review.

**Outcome:** The new forecast aligns better with actual cash flows, improving the organization's ability to plan ahead. **Challenges and Lessons Learned**

1. **System Challenges:** Some complex transactions required manual reconciliation, despite Oracle's auto reconciliation tools.
2. **Delayed Payments:** Payment delays from clients affected cash flow, emphasizing the need for closer follow-up.
3. **Unexpected Expenses:** Unplanned operational costs highlighted the importance of maintaining cash reserves. **Lessons Learned: Automation is Key:** Leveraging Oracle's tools more effectively will reduce manual work. **Continuous Monitoring:** Regularly reviewing forecasts ensures accuracy and timely adjustments. **Proactive Communication:** Building stronger relationships with clients and vendors minimizes delays. **Recommendations**
4. **Maximize Use of Automation:** Utilize Oracle's automated reconciliation tools more effectively to save time and reduce errors.
5. **Scenario Planning:** Use the forecasting tool to simulate different scenarios (e.g., best-case and worst case) for better preparedness.
6. **Ongoing Training:** Regularly train the finance team on Oracle ERP's features to keep them updated on best practices.

**Thank you for your attention.  
If there are any questions,  
We would be happy to answer them**
